ABOUT ME

Motivated Web Developer specializing in React, with a track record of inventing real-world digital products. Collaborative team player with a passion for leveraging cutting-edge technologies. Committed to delivering high-quality code.

EDUCATION

ACADEMY OF DIGITAL INDUSTRIES

Certificate of Achievement in Front-End Course

Successfully completed the rigorous Front End Bootcamp, gaining comprehensive training in HTML, CSS, JavaScript, and Angular, and developing a strong foundation in creating visually appealing and user-friendly websites.

INTERNATIONAL BACCALAUREATE

Diploma Program - Computer Science as Higher Level Subject

IB is known for its rigorous curriculum that emphasizes critical thinking, research skills, and global perspectives. As a Higher Level student, I was required to delve deeper into Computer Science concepts and theories, as well as develop practical programming skills.

HOWEST UNIVERSITY OF APPLIED SCIENCES

Bachelor of Applied Computer Science

This program is providing me with a comprehensive understanding of Computer Science concepts and practical skills through coursework, projects, and internships. I am gaining expertise in areas such as software engineering, database management, and cybersecurity. The program emphasizes hands-on learning and collaboration with industry partners to prepare students for successful careers in the dynamic field of Computer Science.

WORK EXPERIENCE

FREELANCE DEVELOPER

- Created and implemented a parking management app for a local company, streamlining the parking process and enhancing user convenience, resulting in increased efficiency and customer satisfaction.
- Developed a delivery helper app for a pet food company, optimizing delivery routes and improving tracking capabilities, leading to improved delivery efficiency and reduced costs.

GADAWERE.GE

- Founded and conceptualized gadawere.ge, the first Georgian paraphrasing tool, leveraging my innovative thinking and entrepreneurial spirit to identify the need for such a tool in the market effectively.
- The platform gained remarkable traction, attracting over 10,000 users within the first month of deployment, enabling users to easily paraphrase texts with high accuracy, leading to increased productivity and efficiency in content creation and academic writing..
- Acted as the sole developer, responsible for designing and implementing the entire platform, utilizing various services like Stripe for payment processing, AWS for cloud infrastructure, and Firebase for database management.
